Dear Parents,

This year’s Science Fair is quickly approaching. We have exciting news! This is the second year of the new fair. The categories are Life and Physical Science, and STEM. This has become such an exciting field to explore that it was decided that it belonged in our Fair. The breakdown will be slightly different. Life and Physical are combined into a traditional category, and STEM is the other. These will be combined in grade bands; kindergarten and first, second and third, and fourth and fifth grades. Our Fair is planned for Wednesday, April 15th. Anytime is a great time to get started on these fun projects (except maybe the night before). Do the project, collect the data, take pictures and when the time comes to put it all together you’re ready.

Please note that in the STEM category you will need to build a prototype, not just come up with a design. Your prototype will need to solve a problem.

The rules and guidelines are available on our school website. Please review and follow them carefully. Registration forms are due by April 8th. This date is very important because we need to arrange for judges. If your form is late, you may participate, but your project may not be judged. Please sign up now and have your child return this form to the office.

Thank you,

Mrs. Gubler 😊 and Mrs. Houghton
