

Students and Parents,

We are excited to announce that Three Falls will be continuing our STEM clubs this year. Two Years ago we were selected by the Governor's Office of Economic Development's STEM Action Center to receive funding for a robotics program and a computer science program!

We will be starting the Robotics Club application process Monday September 16. We will accept 30 students into the Robotics club. Applications are due by Monday September 23, 2019 at 4:00 pm. This club will have an application process and students will be chosen based off of a point system. The point system is explained in the application.

This will be a before school program that will run every Thursday morning from 7:55-8:55. The robotics club will start meeting Thursday October 3, 2019 and end after the competition in January. We will be getting club T-shirts this year and are asking for a club donation of \$10. If this is a hardship for you and your family, please let us know. We don't want this to be a deterrent for our clubs. We do have some scholarships available to offset this cost.

If you, the student, are interested in applying for the robotics club please fill out the application. Make sure to **follow each step** in the application process. You can find the application in the office or print it out online. If you were in the robotics or computer science clubs last year, you **will** need to submit a new application.

Again, we are excited to continue on this exploration adventure. We had some great experiences with the clubs the last few years. We feel that this is an awesome opportunity for our school and our students.

If you have any questions please feel free to email, call, or come and talk to Mrs. Wilber or Mrs. McMurray.
