

Do you have a question or want to solve a problem? Start your Science and Engineering Fair project now and let's get ready to discover the answer!

The fair is usually held in April with the District competition usually being held in May, but the sooner you start the better! Your students can present either an experiment or a solution to a problem that they've engineered, which gives them the freedom to explore whatever they are curious about! Below you can find some tips and resources to help your student's project really stand out:

Experiments:

Show the scientific process

Include a Bibliography:

Where did your information come from?

Engineering:

Solve a real world problem

How did you think of your solution?

Be sure to take pictures! These will help with your presentation! Presentation boards can usually be purchased in the office or at your local grocery store.

Places to find help or ideas:

- Check out the UTU Innovation Center! They are very friendly and would love to help with your ideas.
- Google the term "Science Fair Projects"
- Check out Mark Rober on YouTube
- Visit [mysterydoug.com](http://mysterydoug.com) and check out his videos!
- Don't forget about good ol' Bill Nye the Science Guy!
